

computer. So your online expenses are kept to a minimum, while the input you receive is as extensive as you wish it to be.

***IT: more than meets the eye.**

Although we've used a simple question and a simple explanation to illustrate the beauty and utility of *IT, Information Transfer uses, in fact, incredibly complex programming to accept and analyze your natural language input. All the protocols, all the different computer command languages, all the database choices and search strategies have been pre-programmed to interact with you ... in the most friendly sequence ever devised.

*IT does all the work. But you maintain all the control.

Who can use *IT?

Unlike so many so-called information access programs, *IT is truly wide-ranging in its applications.

*IT is a stand-alone expert system. *IT works with UNIX™ and UNIX-like operating systems on mainframes, minis and hard-disk equipped micros (including the IBM-XT™) with most modems. No other add-ons or limiting devices are necessary.

The *IT software is available on diskette, fully compatible and ready to load onto your mini or micro system. You may also order *IT as a tape which, when loaded into a large mini or main-frame computer, will accomodate many users simultaneously.

One more simple question.

How can you get more in-depth information about *IT?

And the simple answer:

Call us now at (216) 371-5640 ... or write
DATA-EASE, Inc., 3130 Mayfield Rd.,
Cleveland Heights, OH 44118 ATTN: *IT.

**A New
Dimension
In Information
Access.**

Information Transfer ... what is *IT?

Information Transfer is the most remarkable software yet devised to fulfill your day-to-day information needs.

*IT can locate and transfer information from over 250 specialized databases directly to your personal or mainframe computer.

Information ... your most valuable resource.

Information you need ... to make important decisions ... to complete special projects ... to advance research. Information that, in the past, required the skills of people with special training to access. And a lead time of days ... even weeks ... to obtain.

Information. Sometimes expensive. But never as costly as the consequences of not having it at hand.

Now the information of the world is available at your fingertips. Whether or not your fingers have ever touched a computer keyboard. Through *IT.

Look out, world!

Ask a simple question.

The only skill you really need is spelling.

*IT: Online Search Assistance
Query

Type your information request.

If you use a PROPER NOUN — company name, trade-name, geographic location, person, etc. — please enclose it in QUOTES.

Type ? for help.

What are the effects of the economy on voting?

*IT is checking for appropriate databases, PLEASE WAIT.

You don't need any knowledge of specific computer command languages, a ten-pound manual of technical symbols and instructions ... or the aspirin. Just your simple question — correctly spelled. And the Information Transfer Software.

*IT: Online Search Assistance

11 Databases Selected, ranked in order

1. PAIS INTERNATIONAL

\$0.20/online display; \$1.15/min

Public Affairs Information Service covers international relations, economics, law, political science, public policy, social welfare and related issues.

210,000+ Records 1972-Present

2. U.S. POLITICAL SCIENCE DOCUMENTS

\$1.08/min

Article summaries from major US political science journals.

Then you're off to the races: *IT will rapidly evaluate the databases that could apply to your inquiry and provide you with their names, their charges for connect time and record display, and a description of what each database contains.
